

"HAZ ALGO" (Do something about it)

Our beloved jaguar is in danger of extinction!

More than 50% of the jaguar distribution has been lost and the chances of long-term conservation are reduced because the necessary strategies are not being met.

Know the ways to protect the jaguar and become an activist for the cause. You can help raise awareness on your social networks, ask our authorities to allocate resources to protection programs, support ecotourism, do not buy fur, sign petitions.

We will not let the jaguar in the past! Use of the power of your voice, take action and share this initiative by @pantheramexico y @mesdeljaguar

We still are on time!
